## **Traffic delays expected along Lochside Drive and Weiler Avenue as Town of Sidney replaces Weiler watermain**

The Town is moving forward with planned infrastructure upgrades in the Lochside Drive corridor. Starting Monday, August 18, crews will begin work near the Weiler Avenue and Lochside Drive intersection to replace the Weiler Watermain and connect it to the new Lochside Watermain, installed in 2024.

Single-lane alternating traffic will be in place during work hours on Lochside Drive for approximately three weeks, and on Weiler Avenue for approximately nine weeks. Drivers should expect delays and consider alternate routes.

These watermain upgrades are part of the Town's ongoing work to maintain critical underground infrastructure, ensuring the community's drinking water is reliable, and resilient to seismic events.

Additional projects planned for the Lochside Drive corridor this year include, but are not limited to:

- Repaving the Tulista Park parking lot;
- Replacing the bus shelter at Lochside Drive and Frost Avenue; and
- Installing a new sidewalk on Fifth Street from Ocean Ave to Weiler Ave.
