UPDATE: Overnight road closure for paving work on McDonald Park Road

On the night of Saturday, September 26, a block of McDonald Park Road between Mills Road and Glamorgan Road will be closed overnight for paving work.

The road repaving is part of the McDonald Park Road Improvement Project, which also involves roadway widening, the addition of a curb, new sidewalks, and parallel parking on the east side of McDonald Park Road, as well as new pedestrian crossings with flashing beacons.

Residents and visitors are asked to remove all vehicles from the street between 6:00 p.m. and 6:00 a.m. on the night of Saturday, September 26 to allow paving work to proceed safely and efficiently.

No through traffic will be permitted during the paving operation. A detour route will run along Littlewood Road and Glamorgan Road. Emergency vehicles will have limited access through the construction area.

While BC Transit will initially pass through the area on its regular route near 6:00 p.m., evening buses will follow the detour route with a temporary transit stop near the intersection of Mills Road and McDonald Park Road.

This work is weather dependent. If conditions are unsuitable or unforeseen circumstances arise, paving will be rescheduled to the next suitable day.
